

CFFT Specimen Banking			
Study Long Title	Longitudinal Cohort Study to Collect Biospecimens from Healthy Infants in the First Year of Life		
Short Name	BONUS - Healthy Matched Controls		
Specimens Currently Available to Other Researchers	Not Yet		
Current Study Status	Closed		
Study Timeline Metrics			
	Planned	Actual (Sponsor)	
Begin Enrollment	08/01/2011	08/31/2011	
Complete Enrollment	10/24/2012	11/08/2011	
Study Complete	11/01/2013	12/03/2012	
Number of Patients Planned	26		
General Study Information			
Study Type	Observational		
Intervention Type			
Control Type			
Blinded	No		
Randomized	No		
Duration of Subject Participation	10 Months		
Endpoints Evaluated			
Trial Specific Link on ClinicalTrials.gov			
Primary Manuscript Link			
Primary Manuscript Citation			
Eligibility Criteria			
Age	1 Months to 3 Months		
FEV1	No FEV1 requirement		
P. aeruginosa status	Not Applicable		
B. cepacia status	Not Applicable		
Other Primary Eligibility Requirements	Subjects are recruited from a 2 month healthy infant visit at a community pediatric center. Eligible subjects must have a negative newborn screening test for cystic fibrosis.		
Biorepository Specimen Information			
General Specimen Information			
Families will be requested to collect and urine and stool at designated time intervals that would correlate with routine healthy infant visits at 2, 4, 6, 9, and 12 months of age. Urine and stool metabolomics will be analyzed and if consent is given the specimens will also be banked.			
Visit #	Time from Baseline	Specimens Collected	
1	+2 Months	stool, urine	
2	+4 Months	stool, urine	
3	+6 Months	stool, urine	
4	+9 Months	stool, urine	
5	+12 Months	stool, urine
